ETI 2105: FUNDAMENTALS OF COMPUTING

Lecturer: Dr. Catherine Onyango

(cnjeri@jkuat.ac.ke)

Jomo Kenyatta University of Agriculture and Technology

BSc. Telecommunication and Information Engineering

Year 1

10th March 2026

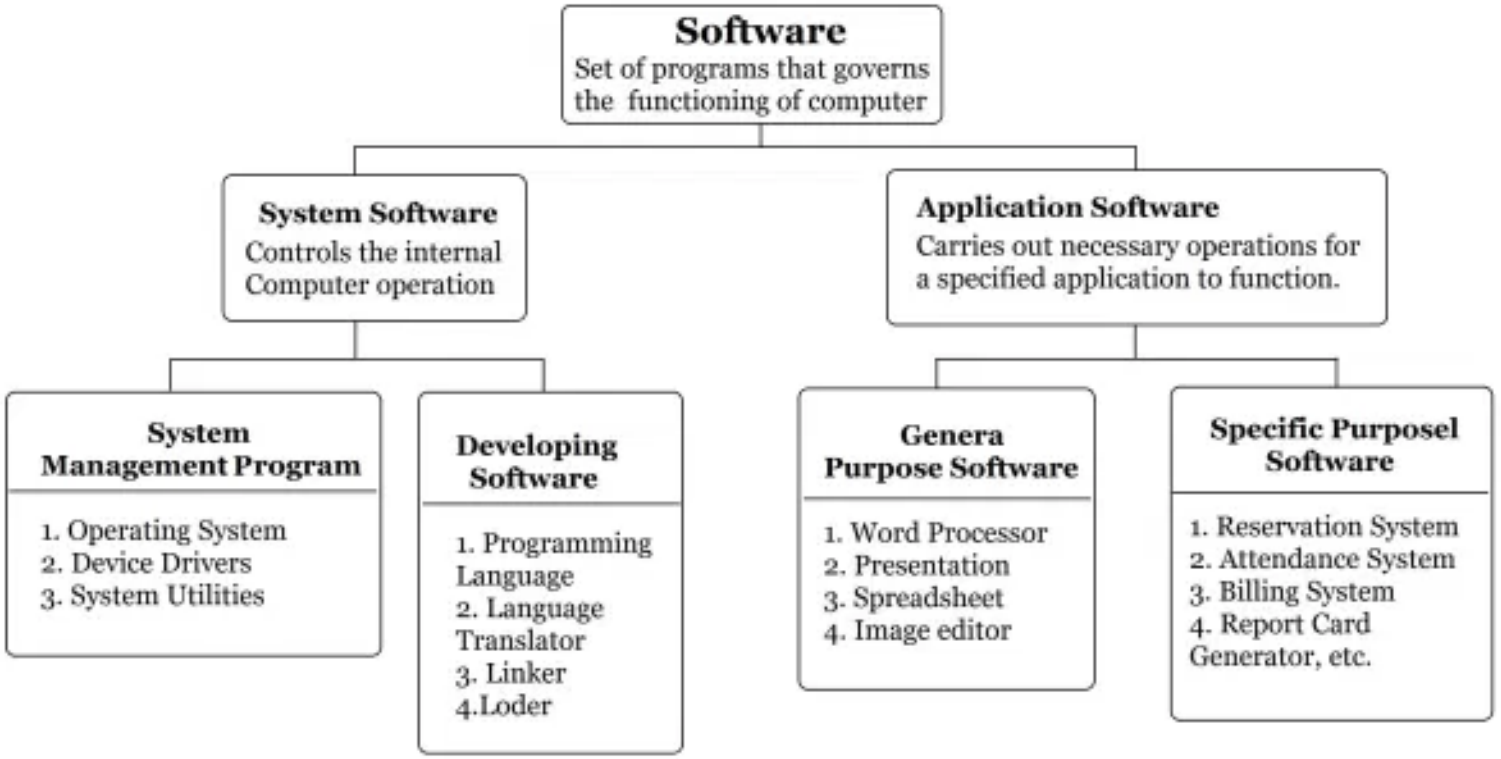

Basic computer terminology

- **Computer**
  - A device that accepts input, processes data, stores data, and produces output, all according to a series of stored instructions.
- **Hardware**
  - Includes the electronic and mechanical devices that process the data; refers to the computer as well as peripheral devices.
- **Software**
  - A computer program that tells the computer how to perform particular tasks.
- **Network**
  - Two or more computers and other devices that are connected, for the purpose of sharing data and programs.
- **Peripheral devices**
  - Used to expand the computer's input, output and storage capabilities.

Basic computer terminology

- Hardware:
  - Input devices
  - Output devices
  - Storage devices
  - Processors
- Software:
  - System Software
  - Application software

Basic computer terminology

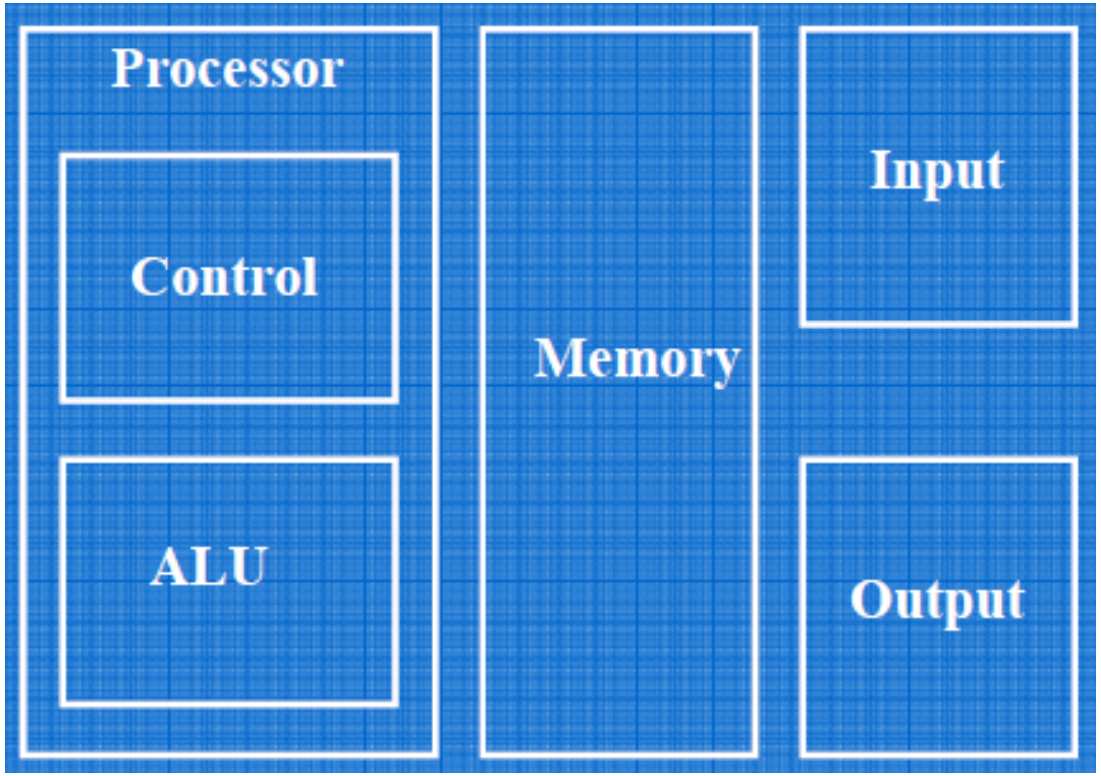

Basic computer terminology

- **Input**
  - Whatever is put into a computer system.
- **Data**
  - Refers to the symbols that represent facts, objects, or ideas.
- **Information**
  - The results of the computer storing data as bits and bytes; the words, numbers, sounds, and graphics.
- **Output**
  - Consists of the processing results produced by a computer.
- **Processing**
  - Manipulation of the data in many ways.
- **Memory**
  - Area of the computer that temporarily holds data waiting to be processed, stored, or output.
- **Storage**
  - Area of the computer that holds data on a permanent basis when it is not immediately needed for processing.

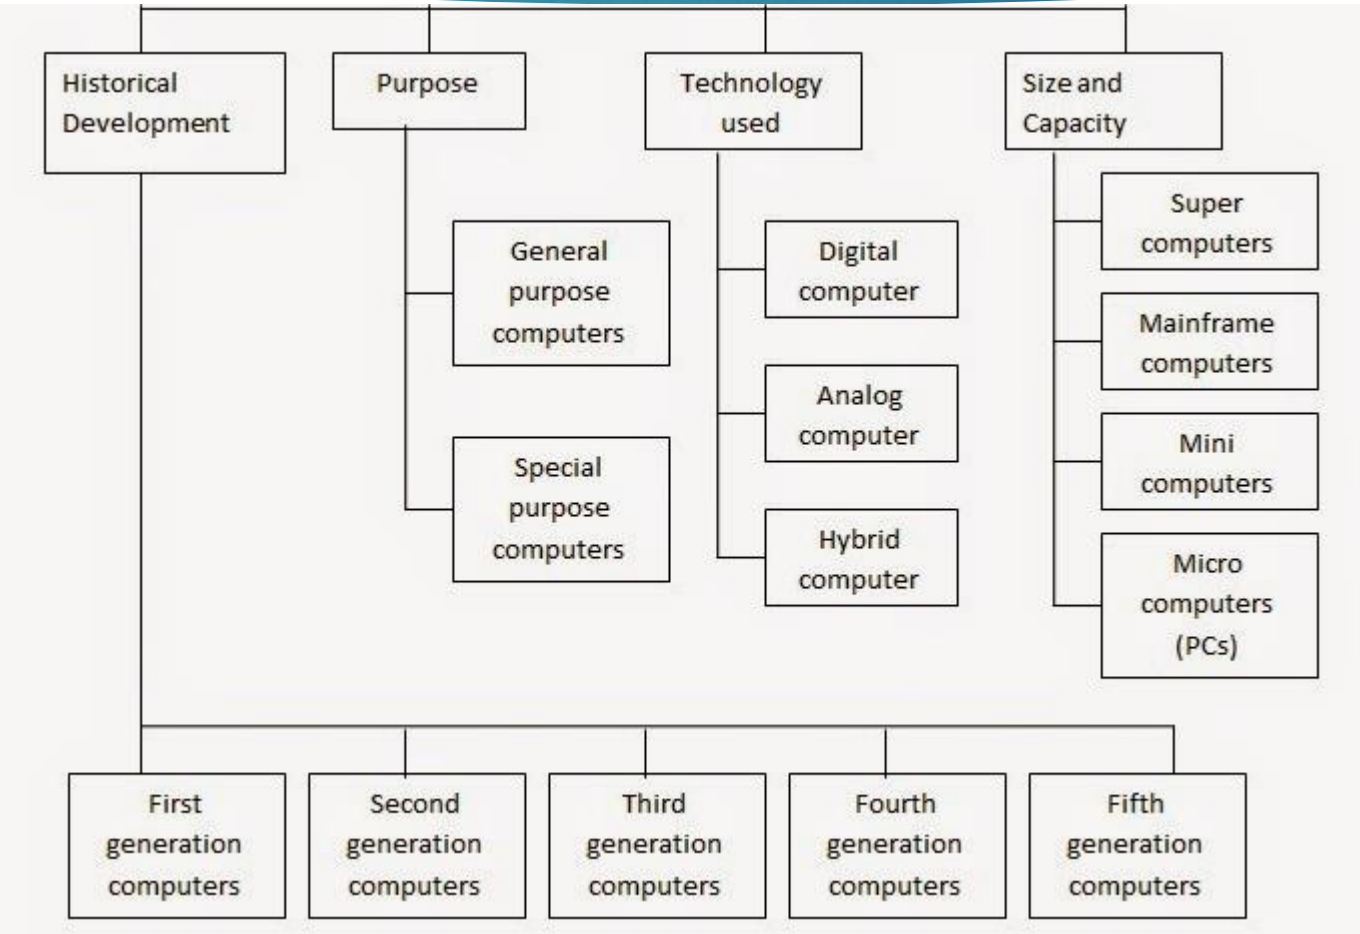

Functions of a computer

- Accepts data and instructions.
- Stores data and instructions awaiting processing or output.
- Processes data as per the instructions.
- Controls operations taking place.
- Gives results in the form of output.

Functional units of a computer

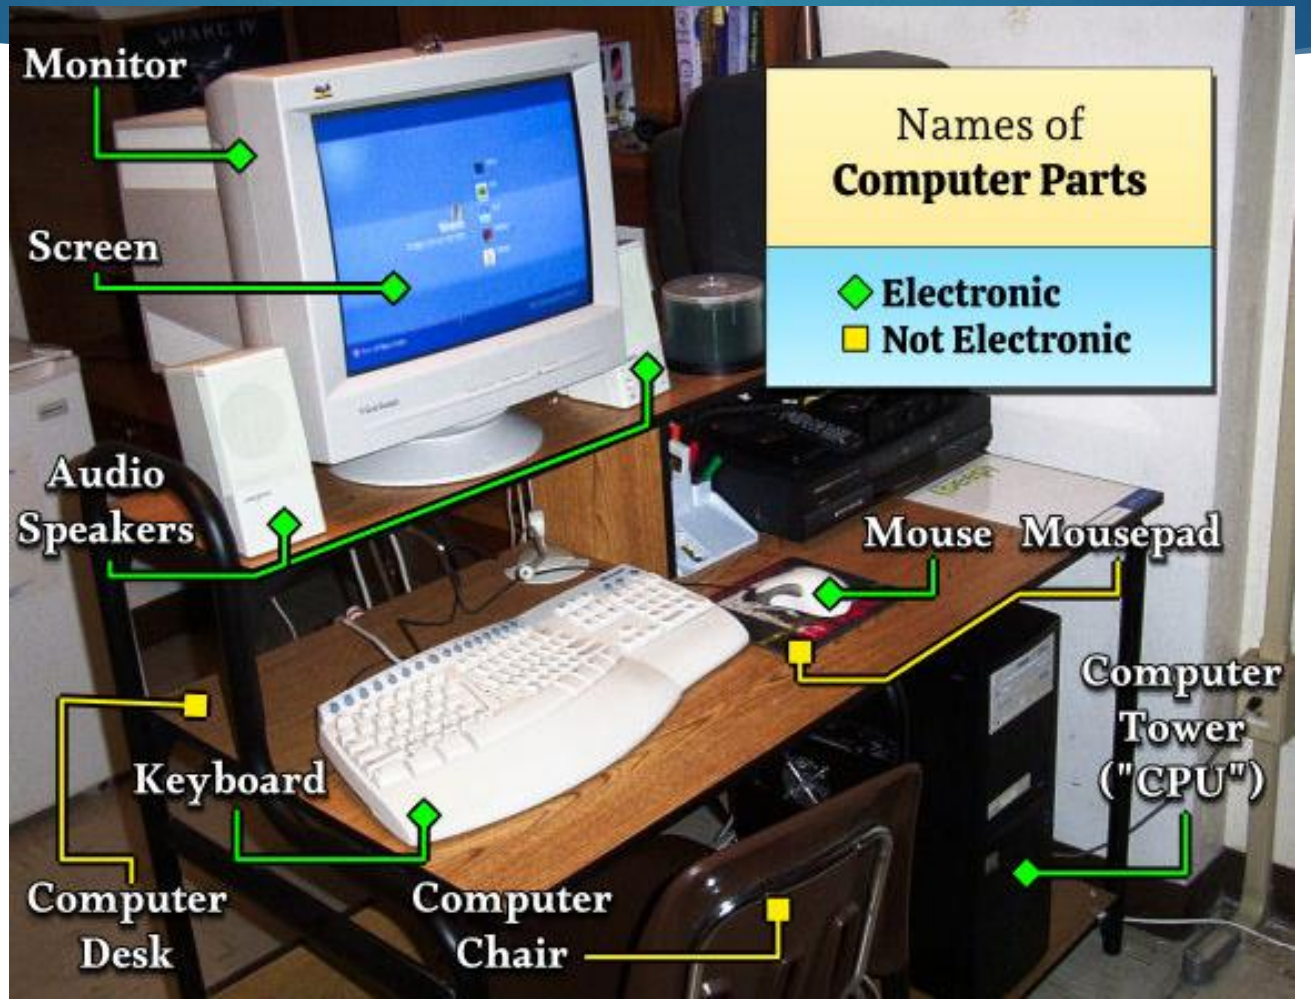

Classification and uses of computers

Impact of using Computers

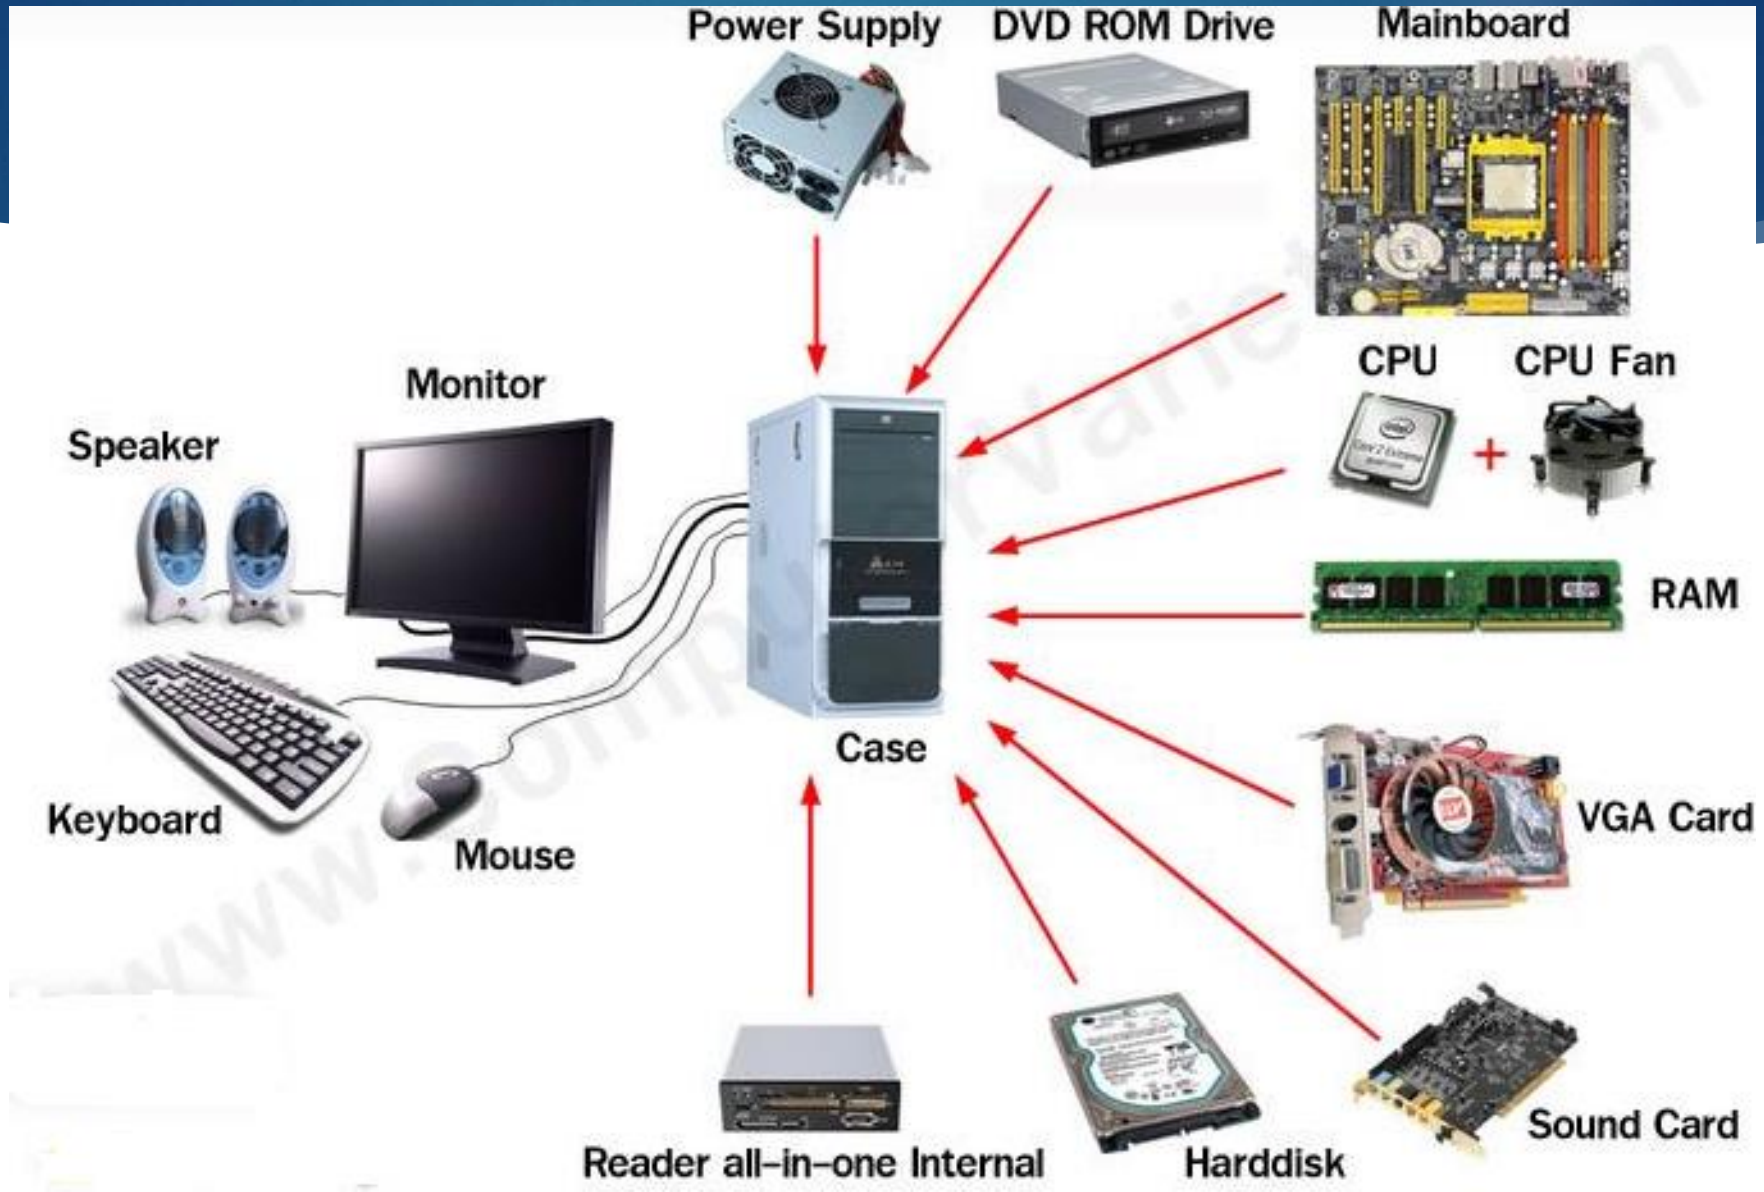

- Positive: speed, reliability, consistency, storage, communication
- Negative: health risks, violation of privacy, public safety, impact on labor force, impact on environment

The Computer Unit

The Computer Unit
